Patryk Kiełsa

SOFTWARE ENGINEER

Profile

I'm an enthusiastic Software Engineer with a proactive attitude and talent for problem solving. Having experience with procedural, functional and object oriented programming paradigms, I have worked extensively with many modern technologies including Python, JavaScript, AWS Services, Terraform and Node.js. I'm comfortable working in cross-functional teams using Agile development and modern code review practices.

After 9 years in the United Kingdom I'm looking for a company in Poland which I can help to develop top tier software solutions by applying my skills and passion for tech.

Employment History

Junior Software Engineer, Hippo Digital, Remote

NOVEMBER 2022 — PRESENT

- Collaborated with an Agile team, participating in daily standups, Three Amigos sessions, sprint planning while developing software solutions iteratively.
- Created **data integration** projects for clients, being involved in the process from the design stage to deployment and beyond.
- Worked with **Python, JavaScript, AWS, Terraform** and more.
- Adjusted software designs to incorporate new features into projects and used facts and best practice to suggest improvements in the code base.
- Used both manual and **unit testing** to ensure robustness of the code.
- Investigated and fixed bugs in Dev, UAT and Production environments.

Software Developer, Freelance, Bristol

AUGUST 2022 — NOVEMBER 2022

- Developed clear specifications for project plans using pre-determined requirements.
- Integrated third-party tools (e.g. **Google Maps API, AWS Cognito**) into applications.
- Worked with **Svelte, React and Typescript**.
